High-quality, cost-effective, and technically sound communication products serve an important role in raising awareness, visibility, and understanding of the work that we do around Results-Based Financing (RBF) and the tools associated with the financing mechanism.

Established in 2003 and operating within the World Bank Group, GPRBA helps to improve the delivery of basic services, including water, sanitation, energy, health and education, for low-income communities that might otherwise go unserved, usually due to the high-cost of access and the lack of service providers willing to extend to poor areas.

Drawing on our lessons learned from diverse programs in 29 countries across seven sectors, GPRBA serves as a Center of Expertise on RBF and convenes leading thinkers in development finance to share knowledge and best practices and explore bold new financing approaches to benefit low-income households. Together, we promote results-based financing as essential to fostering human and economic development.

The program, initially established to test output-based aid (OBA), was known as the Global Partnership on Output-based Aid (GPOBA) until February 2019. It was renamed to the Global Partnership on Results-Based Approaches (GPRBA) to reflect a new emphasis on testing other types of results-based financing approaches.

At the heart of this process (of changing our name) is the new GPRBA logo, developed from a rigorous process informed by staff and stakeholder input. The design of the logo, which is an iconic representation of the work we do on focusing on results and verification, brings the GPRBA brand to life and visually symbolizes what we do.

The GPRBA logo, brand and visual identity are valuable corporate assets* that must be used consistently in the proper forms. We created this guide to make it easy for our partners and key stakeholders to apply our new look. We appreciate your participation in contributing to our standardized visual expression.

We share our partners’ determination to unlock additional resources and move infrastructure and social services projects forward for immediate and long-term impact for low-income communities.

**Our Mission Statement**

The Global Partnership for Results-based Approaches (GPRBA) provides innovative financing solutions that link funding to actual results achieved. Our results-based financing (RBF) approaches provide access to basic services like water and sanitation, energy, health and education for low-income families and communities that might otherwise go unserved.

By bringing together public and private sector funders to maximize resources and designing effective incentives for service providers to reach underserved low-income communities, we give people the chance for a better life.

Any comments or requests for guidance in interpreting or using these guidelines should be referred to rbfinfo@gprba.org.

*Any of our partners who wish to use any of our corporate assets such as logos and templates should send us an email to rbfinfo@gprba.org to get clearance and permission to use our identity.
LOGOS

STANDARD VERSION
Variations of the primary logo.

Variations of the logo with the globe centered above the acronym.

STACKED COLOR LOGO

STACKED GRAYSCALE LOGO

STACKED BLACK LOGO

STACKED WHITE LOGO
LOGOMARK VERSION
Variations of the globe portion of the logo used separately from the acronym.
LOGO USAGE

APPROPRIATE USE

How to use and not use logo variations in certain situations.

Size Restrictions
Tagline versions of the logo should only be used when desired at larger sizes to ensure readability of words. When using the primary logo otherwise, the standard logo should be selected.

Clear Branding
Logomark versions should only be used in situations where GPRBA branding has already been clearly established, preferably when the a full logo is also present on the material.

Visibility
Color logo variations work best on white and are difficult to see overlapped on photography. If there is no clear space light enough for the logo to be clearly visible when placed on, it is recommended to use a white or other light-colored transparency behind the logo to boost visibility. In some cases the white variations of the logo may be more appropriate to use instead. Logo placed over photos should never be placed on busy or cluttered areas for maximum readability.
COLOR PALETTE

All secondary and tertiary colors should be used with at least one primary color, never alone.
